PORTFOLIO – a visual complement to my CV here

Proactive Software Engineer and MSc Computer Science Candidate with 5+ years of proficient experience in full-lifecycle mobile application development and publication. My expertise spans software engineering, machine learning, and deep learning. During my master's studies, I gained hands-on experience training, evaluating, and optimizing language and vision models, building a strong foundation in ML workflows. I have a proven track record, having developed and published dozens of widely used mobile applications both nationally and internationally. I am seeking roles where I can leverage my software development skills and learn more in integrating machine learning models with applications.

EDUCATION

MSc in Computer Science candidate, *University of Trento, Italy*
University of Mongolia
GPA (3.5/4.0)

09/2021 - present BEng in Software Engineering, *National*
09/2016 - 06/2020

EXPERIENCE

Research Fellow

02/2024 — 09/2025

Datascientia research group UniTN

Italy

- Development, deployment and maintenance of [UKC](#) (Opensource Multi linguistic and lexical database) and sub LKC websites
- Maintenance of metadata catalogues of language and ontology datasets
- Mobile application development for the newer version of the app
 - [iLogg](#) - Data collection mobile app for smart citizen research project

Senior Software Engineer

01/2021 — 08/2023

Octagon LLC (Full time)

Mongolia

- Mobile application development and publishing, and maintenance
 - [YESH.MN](#) - Test-based learning for high school students preparing for the university general entrance examination.
 - [Octagon Wallet](#) - Mobile application for Octagon Ecosystem - a crypto exchange market, NFT marketplace, and digital wallet.
 - [Walk and Earn](#) - Mobile application for the statistics on the walking of the national citizens.

Software Engineer

09/2019 — 01/2021

And Global / Digital Mall LLC (Full time)

Mongolia

- Mobile application development and publishing, and maintenance
 - [Banana Mall](#) - An e-commerce platform for selling and delivering products online
- Core back-end, API and web application development and maintenance
 - [Banana Mall](#) web application and its management admin panel
- Database support engineering

Senior Software Developer

07/2020 — 09/2025

Alpha Labs LLC (Remote)

Mongolia

- Mobile application development and publishing, and maintenance
 - [100 ail market](#) - E-commerce mobile platform designed to digitize and consolidate Mongolia's building materials trade
 - [BSB.mn](#) - E-commerce mobile application for online shopping and delivery service of BSB group
 - [Taiki](#) - Mobile application dedicated to citizens of Kazakhstan for purchasing products from China.
 - [SUVD Online](#) - E-commerce mobile application that imports and resells product from South Korea
 - [G-Power Monitoring](#) - For the clients of a power supply company for monitoring and surveillance of power consumption

MACHINE LEARNING PROJECTS

Analysing archer's body posture with Motion Capture System to detect incorrect posture

- Analysed the body posture of an archer using MoCap to capture key postural parameters detecting incorrect posture

Test Time Prompt Tuning with MEMO

- Re-implemented MEMO (Marginal Entropy Minimization with One test point) to improve the performance of the pre-trained model on image classification task at a test time.

Interpreting Sign Language Letters

- With my team built a system that recognizes six Sign Language alphabet gestures (sensors, electric and programming)
